HACKATHONS AND PERSONAL PROJECTS

HackTX- University of Texas at Austin

Nov, '19

Started development on front-end (and learned basics of JavaScript & React) for project to crowdsource volunteering and donation efforts for natural disasters

TAMUHack- Texas A&M at College Station

Jan, '20

Used knowledge of React to develop a website designed for people who do not travel often that could be used as a substitute to a travel app to save storage/time. Development supported both mobile and desktop variants in browser.

Personal Website

A personal project currently in development. A website I am putting together to both get familiar with front-end work and showcase my resume and personal links. This project is made with HTML/CSS and JavaScript.

EDUCATION

Grades

Texas A&M at College Station – Computer Science
Engineering Honors
Junior, GPA 3.809

Languages
